

Product Number: 20 Electrical Unit Protection SCU Intumescent Strip and Sleeve

Description:

Intumescent strip or sleeve to protect the cable entry and seal off in the event of a fire inside the consumer unit.

Use:

To contain any fire within the enclosure or cabinet and to minimise the escape of flames as per Regulation 421.1.201. In the event of a fire the strip or sleeve will seal up the weak points of non-combustible consumer units (cable entries for example) containing the fire within the box.

SCUB1, 2 or 3 – to protect back entry opening
SCU/1 or 2 – to protect top and bottom cable entry openings
SCUS1 or 2 – to protect hollow wall back entry opening
(See Envirograf® Guide to Amendment 3 for further information)

The strips and sleeves are easy to fit and come in a range of sizes which can be trimmed to fit, if necessary using scissors or a knife.
